> **HARDIGG® ROTO-PACK PRODUCT LIST**

> ROTO MOULDING TECHNOLOGY is a versatile manufacturing process that produces highly durable ruggedized shipping cases. Several moulds are placed on a machine at the same time, plastic resin is loaded into each of the moulds which are then heated and slowly rotated on both the vertical and horizontal axis.

DESIGN ADVANTAGES: Roto Moulding results in seamless parts with more material in the corners and edges for additional impact protection. Since the material is not stressed during production the finished part is stronger.

Go to: rotopack.peli.com
for a complete description of the
Roto Moulding process

> BLACKBOX™ RACK MOUNT CASES

These lightweight, compact, and double ended cases offer light to medium duty protection and boast significantly better light duty shock performance than the competition. The use of recycled materials in the shell and a sturdy steel frame offer great value while upholding Hardigg's industry-leading standards. When you need to be cost-conscious but can't sacrifice performance, BlackBox is the answer.

- 61 cm (24") Rugged steel rack frame with M6 threads designed to meet ANSI/EIA 310-C
- Rack designed for applications up to 45 kg (100lbs)
- Shock mounts provide 5.1cm (2") of sway space to isolate equipment
- 5.1 cm (2") lid and 12.7cm (5") lid with edge casters
